FROM EVIDENCE at hand in the form of unsolicited testimonials, we feel that our work is giving eminent satisfaction. With this encouragement, we take the liberty to present to Architects, Decorators and Home Beautifiers our Catalog of Composition and Plaster Relief Ornamentation.

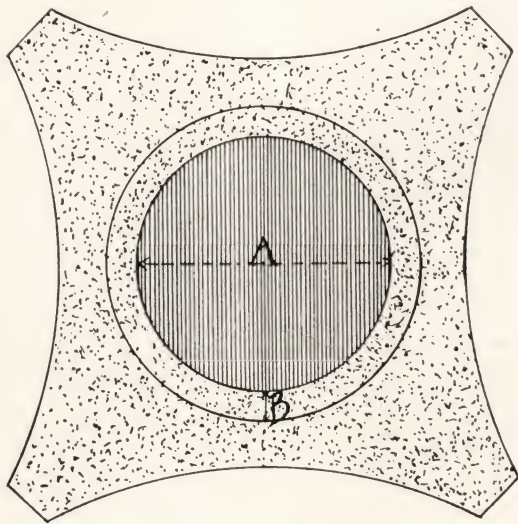

Our work as here illustrated and described is of the highest grade and best quality; an evidence of merit being the fact that our efforts have withstood the test of time and have added many new patrons to our constantly increasing list.

The sterling worth of our work makes it inimitable.

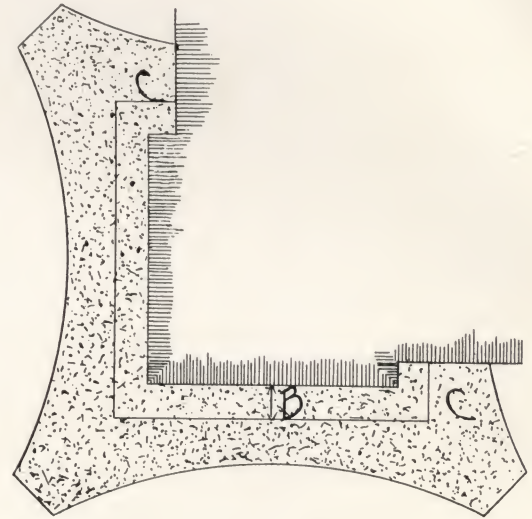

Careful study has been taken, and neither expense nor sacrifice been spared to make this catalog attractive and interesting as well as instructive; and at the same time we feel assured that we can meet any competition where quality as well as price is considered.

Hoping that your attention to our catalog will lead to closer business relations, we wish to thank you for past favors and appreciation and again assure you of the class of work done by

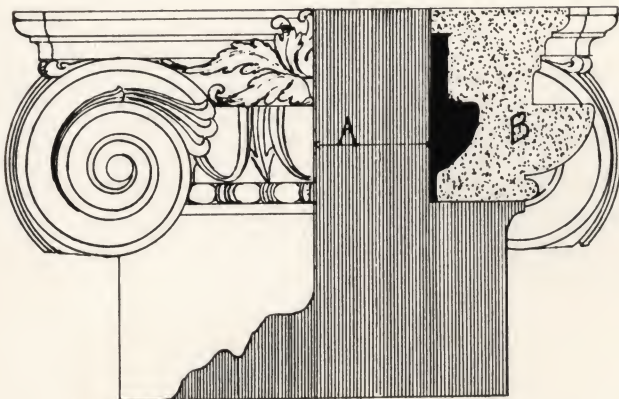

FISCHER & JIROUCH

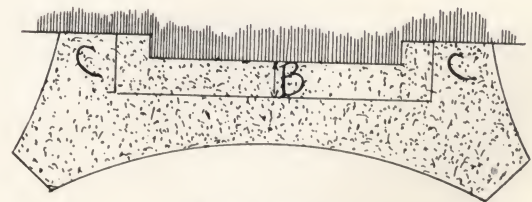

ABACUS PLAN

CORNER PILASTER

COLUMN PLAN

PILASTER

"A" indicates the core or extended shaft running through Capital.

"B" shows the thickness of our Composition.

"C" indicates the return of Pilaster Capital which should always be mentioned in ordering Pilaster Capitals.

EXPLANATIONS & INSTRUCTIONS

THE ILLUSTRATION on previous page gives you the construction of our Modern Scamozzi Ionic Capital as applied to a column, showing the wood shaft and core running through the capital, thereby supporting the weight above.

Our capitals are furnished as cut on opposite page demonstrates, showing the neck mould turned on columns, providing a wooden shaft is used ; but for a plaster shaft we furnish neck mould right on capital, which should always be stated when ordering same. A trifle more height for the core should be allowed, so the weight of the entablature above will rest on shaft—not on capital : $\frac{1}{8}$ inch up to a 10 inch diameter, $\frac{1}{4}$ inch above that size.

The thickness of our stock is 1 inch up to a 10 inch diameter capital, making the core of a 10 inch capital 8 inches, of an 8 inch capital 6 inches ; above 10 inches, allow $\frac{1}{8}$ inch more for the thickness of material for every 2 inches of increased size, making core of a 16 inch diameter capital $13\frac{1}{4}$ inches, etc.

In sending us your order, always bear in mind to give name, number and size of diameter or width, also state whether interior or exterior.

Our stock of models is continually increasing, and we have a considerable amount which we have not yet catalogued, and which will be sent on application if after writing us we learn your requirements.

Special designs are promptly and artistically carried out in wood, stone, cement and models made for iron and brass casting.

Roman Ionic Capital "II."

Exterior Composition and Interior Fibrous Plaster.
